

## **AmeriFleet Transportation to charge fuel recovery cost for SUVs and trucks**

Nov-7-2007

Two years ago, AmeriFleet announced that it would have to start charging a fuel charge to offset higher fuel prices it was incurring when it transported cars on your behalf.

Now that fuel prices have gone even higher, AmeriFleet has announced that, effective November 5, 2007:

- AmeriFleet will implement a special Fuel Recovery program, with slightly higher rates, for vehicles with low MPG ratings (e.g., SUVs and trucks over 10,000 GVW)
- The Car fuel recovery rate will remain the same.

For more information and pricing, contact your PHH Account Team.
